 Monarch Risk Management

Client

St. Paul's, a continuing care community located in Greenville, PA, is home to more than 425 seniors. Independent living, aging-in-place apartments, nursing care and home-based services make up the bulk of the services provided. St. Paul's mission is to provide meaning and richness to the life of each resident. Its vision is to create a sense of belonging and purpose by providing a place to call home for those who choose to become part of its family.

Background

St. Paul's self-insured Workers' Compensation program had been experiencing high costs related to both frequency and severity of claims.

Solution

Monarch Risk Management used a process that involved Leadership Development, Employee Engagement and Accountability for Safety.

"Monarch's approach had an immediate positive impact on our organization, not only from a dollars and cents perspective, but also in improving the overall morale of our team members. This is truly a win/win for us."

—Chris Wright
 COO/CFO
 St. Paul's
